---

Dear hiring team,

To shortly introduce myself, my name is Shreya Jain and I have a experience of 4.6 years. I am currently at John Deere's ISG Digital Team as a full-time UX Designer 2 where I'm working closely with product team for crafting user centric UI components for a diverse suite of mobile applications, ensuring a harmonious brand design language. In the past, I've had the good fortune of working with some of the biggest IT services companies and passion projects to improve daily user's experience. At Accenture's products and platform team, not only have I had experience designing enterprise application from scratch to end but also won APP Pinnacle Champions award & Client Value Creation award for my contributions in it. More than anything I switched and learnt new tools like Figma, started working with design system and collaborated with a team of 40 members from diverse background. I've also worked at TCS Interactive, as a solo designer in various short to long term projects and learned a lot through that.

On top of my professional work, I worked on 2 passion projects to continue learning and nourishing my skills as a UX researcher. My passion to connect with people and understand their needs keeps me align with customer centric approach. I want to explore opportunities that would give me the freedom to find solutions by researching from the core and giving the final solutions.

Hence, I am eager to apply my expertise and optimise out there. If you believe we are a good match, I would to love share more of how I may benefit your organisation. Please do not hesitate to contact me at [shreyajaindesign@gmail.com](mailto:shreyajaindesign@gmail.com)

Looking forward,  
Shreya Jain
